

SCHOOL-COMMUNITY RELATIONS

Use of School Facilities and Equipment

Statement of Guiding Principles

By Iowa law, the control and management of school buildings and school property is placed exclusively with the Board of Education and can not be delegated to any other agency. The Board can make its own rules regarding the care and use of a school site, building, and other property.

No individual or group has the right to demand free use of a gymnasium or auditorium or other school facility, but the Board may authorize its use at any time that such use does not interfere with regular school activities.
