

SCHOOL-COMMUNITY RELATIONS

Community Activities Involving Students

Use of Student Carriers Prohibited

The Board of Education recognizes that effective communications are frequently a part of worthwhile civic and community projects. As such, the danger of using students as carriers\* may present a problem in conducting a sound program of education within the schools.

The policy of the Board of Directors, therefore, prohibits the use of students as carriers except in those cases judged by the Building Principal to be of value to the community or of direct educational value to students.

Requests to utilize students in such a manner shall be directed to the appropriate Building Principal.

\*Carriers: Students being used to deliver information, literature or products.
