Construction Contract Bidding

Before the District enters into any contract for construction work to cost twenty-five thousand dollars (\$25,000) or more, the Board shall consult with the building consultant in the Department of Education as to the most approved plan, and shall adopt proposed plans and specifications and proposed form of contract and hold a public hearing with at least ten days notice. In addition, the Board shall advertise for bids as provided by Section 23.18, Iowa Code, provided, however, these procedures need not be followed if emergency repairs are necessary to prevent the closing of school, and the administrator of the Area Education Agency issues a certificate to that effect.
